### Communications platform for staff in outdoor areas

Mobile outdoor devices provide an information bridge between the control centre and staff working out on the tracks. For instance they provide support with making up the train, order processing or shunting. Staff are constantly informed and can transmit work results to the control centre online. This means significant time and quality benefits in day-to-day work.

Name	Ort	
★ Instandsetzung	Düsseldorf Dehrendorf	TH
🔧 Zugreinigung	Limmattal RBL	Ha
★ Zugreinigung	Zürich HB	Ha
★ Bremsprobe	Berlin Nordost	Ha
🔧 Bremsprobe	Berlin W'mark RBF	Ha
★ Reinigung	Berlin Seddin	Ha
